1	2	
2	1	
3	2	
4	2	
5	1	
6	1	
7	1	
8	1	
9	2	
10	3	
11	1	
12	1	
Total	20	

- CLOs (1-3)

B) Notes

- Submission should be done through the YU e-learning system.
- The assignment cover page and website pages with other files should be compressed into one folder and uploaded to the assignment section in YU e-learning.

C) Task

In this assignment, you need to design a website that consists of a minimum of **7 pages** using HTML and CSS. The website should present one specific topic of your choice.

Possible topics (but not limited to these topics)

1. Tourist locations
2. Sport events
3. Historic events
4. Industry
5. Personal portfolio

Technical Requirements /criteria	Marks
1. The website should use an animated text /logo displayed on each page.	2
2. A title should be given to each webpage (in the head section).	1
3. Each page should include a graphical title, paragraphs, heading titles, and images.	2
4. You should use hyperlinks to navigate through the pages on your website.	2
5. You should use at least one link to connect your website to another external website and have it open in a new tab/window.	1
6. At least one image should be used as a link to another page.	1
7. At least one table should be used in proper format.	1
8. At least one list (numbered or bulleted) should be included.	1
9. You should use pseudo-classes to highlight different states of links (hover, visited, unvisited)	2
10. The external style sheet (CSS file) should be linked to at least 3 pages of your website; the CSS file should indicate changes in font type, size, and color. Page background color or image.	3
11. At least one HTML page should be using an embedded style sheet.	1
12. Your website should be user-friendly, well-formatted, use correct labels, have a good coloring schema, and be attractive to the users.	3
